

# Updating EmuNAND by .cia Files

(For New 3DS)

---

It is important that you **must setup EMNNAND** before updating of EmuNAND by .cia Files. Updating SYSNAND by .cia Files **MAY DAMAGE YOUR 3DS SYSTEM.**

---

With EmuNAND configured, go to the Blue 3D Card Menu and select “BOOT Blue3DS Mode”, Enter the System Settings and look for “BLUE” preceding your firmware version:

---

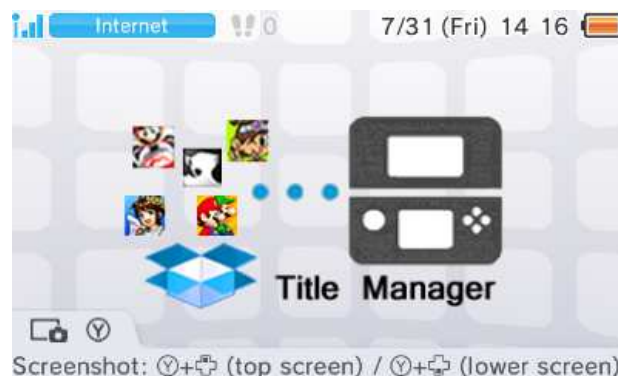

**!!! STOP HERE !!!**

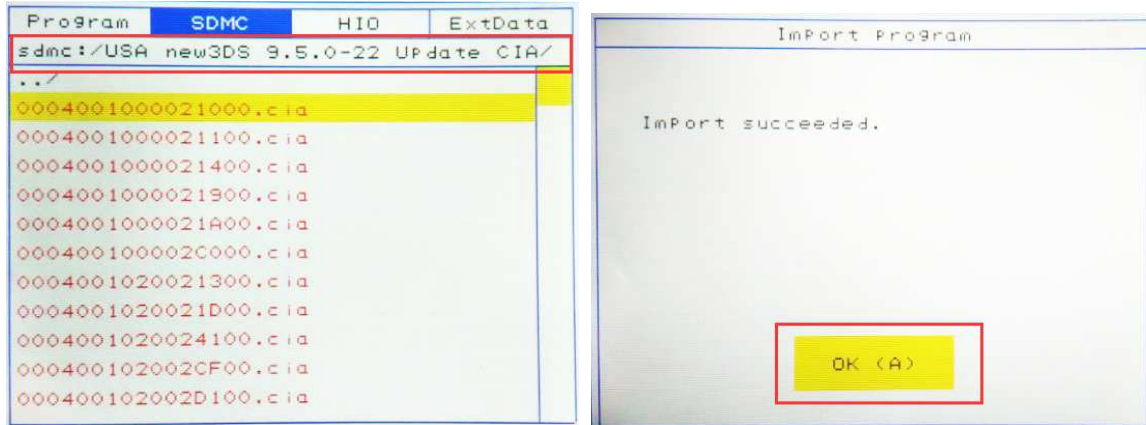

**DOES YOUR NEW 3DS SAY "BLUE" BEFORE THE VERSION NUMBER? IF NOT, START OVER. IF YOU KEEP GOING WITHOUT “BLUE” YOU WILL UPDATE YOUR SYSNAND BY .cia FILES AND THE 3DS SYSTEM WILL BE DAMAGE ! NEVER UPDATE YOUR 3DS SYSNAND BY .cia FILES !**

---

**Step 1:** Go to the Blue 3D Card Menu and select “BOOT Blue3DS Mode”

**Step 2:** Install .cia files in <region>new3DS 9.5.0-23.zip using BBM(Title Manager) in EmuNAND.

**Step 3:** Reboot 3DS system, it will place you back in SysNAND. Return to the Blue 3D Card Menu without holding L and it should automatically place you back into EmuNAND. Check the System Settings again to verify the update. Enjoy!
